Diversity

At the University of Washington, diversity is integral to excellence. We value and honor diverse experiences and perspectives, strive to create welcoming and respectful learning environments, and promote access, opportunity and justice for all.

The Department of Applied Mathematics endorses this University of Washington statement on diversity and is committed to recruiting, supporting, and promoting a diverse student population.

One of the ways we show commitment to this goal is through the active Applied Mathematics Diversity Committee. The committee is comprised of dedicated students, faculty and staff appointed by chair of the department, with weekly meetings to strategize initiatives and activities. The committee has launched a mentorship program, Women in Applied Mathematics Mentorship (WAMM). Past activities have included discussion panels on various topics: women at work, inclusive teaching, political climate, and international student success. Check back periodically for current events.

Campus resources and committee meeting notes may be accessed by department users here. To submit anonymous feedback or suggestions, please use this form. We also welcome you to contact us at amathdiv@uw.edu.
