Dan Hanson, Laurie Feldman

UW online program ranks high in affordability and industry collaboration

"UW's online master’s in Computational Finance and Risk Management (CFRM) program has been ranked as one of the top 16 most affordable online master’s in finance programs by Grad School Hub.

The online CFRM degree is part of a unique and collaborative graduate program that brings together academics, industry professionals, and students to enable a financial application of mathematical methods and skillsets. It also provides students with one-on-one coaching and career opportunities.

Computational finance is unique: it applies mathematical theories and methods to real-life finances to determine probabilities, manage an institution's financial risks, determine asset allocation, and conduct high frequency trading."
